EDUCATION

- **Bachelor of Engineering in Information Technology (CGPA: 8.05/10.0)** 08/2016 – 08/2020
Sal College of Engineering Ahmedabad, India

PROGRAMMING SKILLS

- **Proficient in:** Python, Django, Pandas, C, HTML, CSS
- **Familiar with:** JavaScript, Bootstrap, PostgreSQL, MySQL, Google cloud run, Docker
- **Operating System:** Windows and Linux (Ubuntu/Debian)
- **Version Control:** Git

PROJECTS

- **Alot Todo** (🐙 [meetdaxini/Alot.Todo](https://github.com/meetdaxini/Alot.Todo)): Alot Todo is a multi-user task manager web app made built using django as back-end and HTML, CSS and Bootstrap for the front-end. It is deployed using Heroku and PostgreSQL. Project is live at :
🔗 alot-todo.herokuapp.com
- **Movie Recommender** (🐙 [meetdaxini/movie-recommender-project](https://github.com/meetdaxini/movie-recommender-project)): Built using Django, HTML, CSS and Bootstrap. It is deployed by using a Docker Container, Google Cloud Run, Google Cloud SQL(PostgreSQL). It uses TMDB API for daily trending movies data and poster, TasteDive API for movie recommendations & OMDB API for movie ratings data and posters. The omdb api calls are then stored in the database so next time the same movie data will not be fetched from external api. Project is live at :
🔗 movie-recommender-project-mdsqpgljvq-uc.a.run.app
- **Text Utilities** (🐙 [meetdaxini/textutils](https://github.com/meetdaxini/textutils)): This website provides text utilities like punctuation remover, character count, UPPERCASE, lowercase, new line remover, and space remover. You can use multiple utilities together also. It also provides a secure random password generator too. Project is live at :
🔗 mytextutilities.herokuapp.com
- **Faces from Keywords** (🐙 [meetdaxini/Faces.from.Keywords](https://github.com/meetdaxini/Faces.from.Keywords)): In this project, I did character recognition using pytesseract on news paper clippings to find a particular keywords and if the keywords matched, then just the human faces in that image are cropped into contact sheet using openCV, numpy, Pillow This was final project for Coursera Python 3 Programming Specialization.
- **My Portfolio** (🐙 [meetdaxini/my_portfolio](https://github.com/meetdaxini/my_portfolio)): Simple portfolio of mine built using Django as back-end and HTML, CSS and Javascript for the front-end. Check it out at :
